Modern Military Aircraft: The World's Fighting Aircraft 1945 to the Present Day

Modern Military Aircraft: The World's Fighting Aircraft 1945 to the Present Day

Modern Military Aircraft is a comprehensive guide to the world's fighting aircraft since World War II, from the earliest jet fighters and basic piston-engined bombers, to today's high-tech and stealthy superfighters. Aircraft featured include: the F-86 Sabre, which fought its way to convincing victory over Russia's MiG-15 in the world's first jet-versus-jet battles in Korea; the Grumman F-14 Tomcat, the deadliest fleet fighter ever built, which has played an important part in the conflicts of the late 20th and early 21st centuries; and Russia's export miracles the Sukhoi Su-27, currently in service with air arms across the world in an array of variants.

This book contains detailed features on more than 220 combat aircraft and helicopters from the past 65 years. Presented alphabetically by manufacturer, each aircraft is covered in detail, with feature boxes outlining its development, technical specifications, performance data and variants. Unique graphics allow the reader to compare specific features like firepower, troop-carrying capacity, and bombload with those of other aircraft of the same type.
