Oral Pathology: Clinical Pathologic Correlations Joseph A. Regezi, James J. Sciubba, Richard C. K. Jordan

Covering pathologic conditions by clinical appearance, **Oral Pathology: Clinical Pathologic Correlations, 6th Edition** uses an atlas-style format to help you identify, diagnose, and plan treatment for oral disease presentations. Two-page spreads include clinical photos of common conditions on one side while the facing page lists the central features, causes, and significance of each specific disease. Each chapter is organized by clinical appearance, such as white lesions, red-blue lesions, and cysts of the jaws and neck, and includes full-color photomicrographs and clinical photos to help you identify pathologic elements. This edition adds new coverage of oral cancer and new cone beam CT, regular CT, and MRI images. Expert authors Joseph Regezi, James Sciubba, and Richard Jordan provide a quick reference that's ideal for the lab, NBDE review, or chairside use!

- **An atlas-style *Clinical Overview* section** makes it easy to find key information, with one page showing clinical photos of common conditions and the facing page listing symptoms, causes, and significance.
- **Organization by clinical appearance** -- such as including all red-blue lesions in one chapter along with possible causes -- matches what you would expect to see upon a patient's presentation, and provides a practical tool for developing differential diagnoses and planning treatment.
- **Hundreds of full-color clinical photographs and radiographs** depict specific conditions for easier identification in real clinical scenarios.
- **Full-color photomicrographs** help you identify pathologic elements and provide correct diagnoses and treatment plans.
- **Boxes and tables** offer clear, at-a-glance information on the clinical features, diagnosis, and treatment for many conditions.
- **Student resources on a companion Evolve website** include 30 case studies, a 150-question practice exam, and case-based learning to prepare you for the NBDE and for clinical practice.
- **Advanced imaging techniques** include images such as CBCTs (cone beam computed tomography), regular CTs, and MRIs, reflecting the transition from a 2-dimensional to a 3-dimensional approach in acquiring data and reconstructing images, and helping you identify and assess disease entities -- especially tumors of the salivary glands, jaws, and soft tissues.
- **Expanded sections on etiology, treatment, and diagnosis of oral cancer (HPV)** describe how subtypes can play an important role in the development and natural history of some head and neck cancers, most notably those arising in the oropharynx.
- **Expanded section on bisphosphonate-related osteonecrosis of the jaws** helps you effectively manage patients taking bisphosphonates to prevent bone loss, including information on oral complications, risk factors, and benefits.

From reader reviews:

Michelle Beltran:

Book is definitely written, printed, or highlighted for everything. You can understand everything you want by a reserve. Book has a different type. As we know that book is important matter to bring us around the world. Next to that you can your reading expertise was fluently. A guide Oral Pathology: Clinical Pathologic Correlations will make you to possibly be smarter. You can feel much more confidence if you can know about every little thing. But some of you think this open or reading a new book make you bored. It is not make you fun. Why they may be thought like that? Have you looking for best book or acceptable book with you?

Rosa Nguyen:

That book can make you to feel relax. This kind of book Oral Pathology: Clinical Pathologic Correlations was bright colored and of course has pictures around. As we know that book Oral Pathology: Clinical Pathologic Correlations has many kinds or type. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.

Glenn Hancock:

As a college student exactly feel bored to reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just very little students that has reading's heart or real their pastime. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that reading through is not important, boring and also can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Oral Pathology: Clinical Pathologic Correlations can make you sense more interested to read.

Renee Wood:
