Designing and Building Model Railway Baseboards

Ron Pybus

Designing and Building Model Railway Baseboards Ron Pybus

This invaluable, well-illustrated book is essential reading for all those who wish to be guided through the potential pitfalls of making a baseboard and who require practical information about the different kinds of boards and how to construct them properly. Describes in detail how to build several different types of baseboards from the simple box frame, through the monocoque flat board, the drop board and insulation board, to multi-level boards and the helix. With the less adept modeller in mind, the author also explains how to make a baseboard with only a drill, a screwdriver and glue.
