Physical Diagnosis of Pain: An Atlas of Signs and Symptoms (.Net Developers Series)

Steven D. Waldman

Physical Diagnosis of Pain: An Atlas of Signs and Symptoms (.Net Developers Series) Steven D. Waldman

Still **the only atlas available devoted to the physical diagnosis of pain**, this highly practical guide mirrors the clinician's approach to pain evaluation: focusing on "what is it" rather than "where is it." Through concise text, high-quality illustrations, and real-time videos, internationally recognized pain expert Dr. Steven Waldman provides **clear, how-to methods for evaluating and diagnosing more than 240 pain-related conditions** through their physical signs. Comprehensive and lavishly illustrated, this essential atlas is a must-have resource for all practitioners and trainees that encounter patients with pain.

- Provides essential physical examination techniques for the **full range of pain-related conditions** in the cervical spine, shoulder, elbow, forearm, wrist and hand, chest wall, thorax and thoracic spine, lumbar spine, abdominal wall and pelvis, hip, knee, ankle and foot.
- Each chapter follows the same concise format for ease of use and **quick reference**: anatomy, inspection, palpation, and range of motion, followed by relevant special tests.
- Includes **20 brand-new procedures** such as the Sharp Purser Test for atlanto-axial joint instability; the Crank Test for tears of the glenoid labrum; the Chair Lift Test for tennis elbow; the Stork Test for sacroiliac joint pain; the Fulcrum Test for stress fractures of the femur; the Mulder Sign for Morton's neuroma, and many more.
- Provides **exceptional visual guidance** via hundreds of high-quality radiographic images, clinical photos, and color line drawings -- many NEW to this edition.
- Includes **real-time videos** of Dr. Waldman and his staff demonstrating key physical examination techniques, helping you increase your expertise and reach an accurate diagnosis.
