Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) Joanna I Lewis

As the greatest coal-producing and consuming nation in the world, China would seem an unlikely haven for wind power. Yet the country now boasts a world-class industry that promises to make low-carbon technology more affordable and available to all. Conducting an empirical study of China's remarkable transition and the possibility of replicating their model elsewhere, Joanna I. Lewis adds greater depth to a theoretical understanding of China's technological innovation systems and its current and future role in a globalized economy. Lewis focuses on China's specific methods of international technology transfer, its forms of international cooperation and competition, and its implementation of effective policies promoting the development of a home-grown industry. Just a decade ago, China maintained only a handful of operating wind turbines—all imported from Europe and the United States. Today, the country is the largest wind power market in the world, with turbines made almost exclusively in its own factories. Following this shift reveals how China's political leaders have responded to domestic energy challenges and how they may confront encroaching climate change. The nation's escalation of its wind power use also demonstrates China's ability to leapfrog to cleaner energy technologies—an option equally viable for other developing countries hoping to bypass gradual industrialization and the “technological lock-in” of hydrocarbon-intensive energy infrastructure. Though setbacks are possible, China could one day come to dominate global wind turbine sales, becoming a hub of technological innovation and a major instigator of low-carbon economic change.

From reader reviews:

Patricia Rhee:

Hey guys, do you would like to finds a new book to learn? May be the book with the headline Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) suitable to you? The actual book was written by famous writer in this era. Typically the book untitled Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World)is the one of several books that everyone read now. This book was inspired a lot of people in the world. When you read this publication you will enter the new shape that you ever know ahead of. The author explained their strategy in the simple way, thus all of people can easily to understand the core of this book. This book will give you a lots of information about this world now. So that you can see the represented of the world within this book.

Kenneth Handy:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they carrying out activity like watching television, likely to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Might be reading a book can be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the e-book untitled Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) can be good book to read. May be it can be best activity to you.

Sheldon Downs:

Reading can called thoughts hangout, why? Because when you are reading a book mainly book entitled Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) your head will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely can become your mind friends. Imaging each and every word written in a publication then become one web form conclusion and explanation that maybe you never get ahead of. The Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) giving you a different experience more than blown away your brain but also giving you useful information for your better life in this era. So now let us teach you the relaxing pattern the following is your body and mind will likely be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

Betty Blake:

This Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon

Economy (Contemporary Asia in the World) is great publication for you because the content that is certainly full of information for you who have always deal with world and have to make decision every minute. That book reveal it info accurately using great organize word or we can declare no rambling sentences within it. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but tricky core information with lovely delivering sentences. Having Green Innovation in China: China's Wind Power Industry and the Global Transition to a Low-Carbon Economy (Contemporary Asia in the World) in your hand like obtaining the world in your arm, info in it is not ridiculous one. We can say that no book that offer you world throughout ten or fifteen second right but this publication already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. stressful do you still doubt this?
