North African Cretaceous Carbonate Platform Systems (Nato Science Series: IV:)

North African Cretaceous Carbonate Platform Systems (Nato Science Series: IV:)

This volume arises from the NATO Advanced Research Workshop (ARW) on 'North African Cretaceous rudist and coral formations and their contributions to carbonate platform development', which was held in Tunisia, on 13-18 May, 2002. It was convened by M. El Hedi Negra (Universite 7 Novembre de Carthage, now Universite de Tunis El Manar, Tunisia) and Eulalia Gili (Universitat Autònoma de Barcelona, Spain). The aims of the ARW were: (1) to review and critically assess currently available data on rudist/coral formations in North African Cretaceous carbonate platforms, and their correlations, and to integrate these data with other studies around the Mediterranean; (2) to place the findings in a global context, noting both similarities with other regions of platform development as well as local differences, and (3) exploring possible reasons for these; and to help promote the creation of a vibrant peri-Mediterranean collaborative research community, embracing researchers from the entire region, to carry forward this ambitious research programme. Twenty-two presentations (oral and poster) provided both topical reviews (covering rudist evolution, and ecology, mineralogical changes, applications of strontium isotope, and graphic correlation methods, and platform typology) as well as regional syntheses (Tunisian reservoirs, Moroccan platform history, Tunisian platforms and rudist/coral facies, Algerian platforms, and Egyptian platforms). Fifteen of these presentations are expanded here as papers. The workshop was attended by 24 academic staff, 4 geologists from the oil industry, plus several observers and students.

From reader reviews:

Beverly Dewitt:

Book will be written, printed, or outlined for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important issue to bring us around the world. Next to that you can your reading ability was fluently. A reserve North African Cretaceous Carbonate Platform Systems (Nato Science Series: IV:) will make you to end up being smarter. You can feel considerably more confidence if you can know about anything. But some of you think that open or reading the book make you bored. It is far from make you fun. Why they may be thought like that? Have you in search of best book or appropriate book with you?

Christopher Patton:

What do you regarding book? It is not important to you? Or just adding material when you want something to explain what the ones you have problem? How about your time? Or are you busy man? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have time? What did you do? Everybody has many questions above. They have to answer that question simply because just their can do which. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on pre-school until university need that North African Cretaceous Carbonate Platform Systems (Nato Science Series: IV:) to read.

Dominic Maddock:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their free time with their family, or all their friends. Usually they undertaking activity like watching television, going to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Might be reading a book might be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try look for book, may be the reserve untitled North African Cretaceous Carbonate Platform Systems (Nato Science Series: IV:) can be excellent book to read. May be it can be best activity to you.

Teresa Cook:

You will get this North African Cretaceous Carbonate Platform Systems (Nato Science Series: IV:) by look at the bookstore or Mall. Only viewing or reviewing it may to be your solve problem if you get difficulties to your knowledge. Kinds of this guide are various. Not only simply by written or printed but in addition can you enjoy this book simply by e-book. In the modern era such as now, you just looking because of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose correct ways for you.
