MRS of the Brain and Neurological Disorders (Monographs on Statistics and Applied Probability)

Akihiro Igata, Tetsuhiko Asakura, Toshiro Fujimoto

MRS of the Brain and Neurological Disorders illustrates and demonstrates the usefulness of magnetic resonance spectroscopy for the diagnosis of brain and neurological disorders, including epilepsy, nervous disorders, psychiatric disorders, and brain tumors.

The book is unique in that it contains 87 case studies of neurologic and psychiatric disorders accumulated by clinical application of ³¹P chemical shift imaging and ¹H single voxel spectroscopy, using a single MRS system. The extensive case studies, selected from 1,200 patients, include cases of brain tumors, cerebral infarction, cerebral arteriovenous malformation (AVM), Moya Moya disease, cerebral hemorrhage, dementia, neurologic disorders, epilepsy, and psychiatric disorders such as schizophrenia, depression, mania, and alcoholism. Highly illustrated, the book also covers a short history of MRS, explains basic principles of MRS, and summarizes a biochemical study for understanding the ³¹P and ¹H spectra.

While several MRS studies have been conducted by researchers worldwide, no previous book has collected as many case studies. Indeed, with its in-depth examination of the subject matter, MRS of the Brain and Neurological Disorders will play a major role in the progress of in-vivo investigation of neurologic and psychiatric disorders by MRS.

From reader reviews:

Lawrence Gregory:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite guide and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the publication entitled MRS of the Brain and Neurological Disorders (Monographs on Statistics and Applied Probability). Try to the actual book MRS of the Brain and Neurological Disorders (Monographs on Statistics and Applied Probability) as your close friend. It means that it can being your friend when you really feel alone and beside that course make you smarter than ever before. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know anything by the book. So , we need to make new experience as well as knowledge with this book.

George McDaniel:

Have you spare time for just a day? What do you do when you have much more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent their spare time to take a go walking, shopping, or went to the actual Mall. How about open or read a book allowed MRS of the Brain and Neurological Disorders (Monographs on Statistics and Applied Probability)? Maybe it is to be best activity for you. You already know beside you can spend your time together with your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have different opinion?

Robert Alcock:

A lot of people always spent all their free time to vacation as well as go to the outside with them family or their friend. Do you know? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity that is look different you can read any book. It is really fun to suit your needs. If you enjoy the book that you simply read you can spent 24 hours a day to reading a guide. The book MRS of the Brain and Neurological Disorders (Monographs on Statistics and Applied Probability) it is very good to read. There are a lot of those who recommended this book. We were holding enjoying reading this book. Should you did not have enough space to develop this book you can buy typically the e-book. You can m0ore quickly to read this book from your smart phone. The price is not very costly but this book provides high quality.

Clement Williams:

People live in this new time of lifestyle always aim to and must have the time or they will get lots of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely without a doubt. People is human not really a huge robot. Then we request again, what kind of activity do you possess when the spare time coming to anyone of course your answer may unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, typically the book you have read is actually MRS of the Brain and Neurological Disorders (Monographs on Statistics and

Applied Probability).
