## **Telescope** John F. W Herschel

This historic book may have numerous typos, missing text or index. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. 1861. Not illustrated. Excerpt: ... OF THE METHODS PRACTISED IN THE ACTUAL CONSTRUCTION OF LENSES AND SPECULA. (84.)

Having thus described the principal combinations of refracting and reflecting surfaces, which have been devised for the construction of telescopes, it remains to say something of the practical means which have been adopted for the actual manufacture of the specula and lenses. They require a delicate and difficult art, especially as regards the former, where parabolic, elliptic, or hyperbolic figures have to be communicated to the polished surfaces in the very act of polishing them. In the case of lenses, as we have seen, all the requisites of a perfect telescope can be attained by the use of truly spherical surfaces, and these it is comparatively easy to form, by reason of the natural tendency of two surfaces which grind each other by equable rubbing over every part, to work each other into a spherical concavity and convexity exactly fitting. Practically speaking, when it is intended to work a glass surface to a sphere of an exactly assigned radius, the nearly approximate spherical form of the right curvature is first communicated to it by grinding in a metal basin, of the proper concavity, which may be done to some considerable nicety by turning the tool in a lathe, to fit a gauge. The lens is then connected, or otherwise firmly attached, to the lower end of a vertical rod of wood or metal AB (fig. 23), the upper end of which terminates in a steel ball F, working in a cup c, to which it has been accurately fitted by smooth grinding, so that every point of the surface A of the lens, when made to oscillate or revolve conically by a motion given to the rod by a hand grasping it at B (where it is enveloped in woollen cloth or felt, to prevent the communication of warmth), will move in ...

### From reader reviews:

#### **Dirk Sullivan:**

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a wander, shopping, or went to typically the Mall. How about open or perhaps read a book allowed Telescope? Maybe it is for being best activity for you. You understand beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with its opinion or you have some other opinion?

#### **Leonard Parnell:**

What do you with regards to book? It is not important to you? Or just adding material when you really need something to explain what the ones you have problem? How about your time? Or are you busy man? If you don't have spare time to perform others business, it is make one feel bored faster. And you have spare time? What did you do? Every individual has many questions above. They should answer that question due to the fact just their can do that will. It said that about reserve. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need this kind of Telescope to read.

#### **Alma Bulger:**

This Telescope is completely new way for you who has interest to look for some information since it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Telescope can be the light food for you because the information inside this kind of book is easy to get through anyone. These books build itself in the form that is certainly reachable by anyone, yeah I mean in the e-book application form. People who think that in book form make them feel drowsy even dizzy this e-book is the answer. So there isn't any in reading a reserve especially this one. You can find what you are looking for. It should be here for you. So , don't miss this! Just read this e-book type for your better life and knowledge.

#### **Dan Fry:**

You can get this Telescope by check out the bookstore or Mall. Merely viewing or reviewing it could possibly to be your solve trouble if you get difficulties for ones knowledge. Kinds of this publication are various. Not only by simply written or printed but in addition can you enjoy this book through e-book. In the modern era including now, you just looking of your mobile phone and searching what your problem. Right now, choose your ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still up-date. Let's try to choose correct ways for you.
