Umts and Mobile Computing (Artech House Mobile Communications Series) Alexander Joseph Huber,
Josef Franz Huber
This guide bridges the gap between ubiquitous computing (UBICOMP) and third generation mobile
communications. Scenarios indicate how new applications will be developed, and how to implement them.
The text presents distinguishing characteristics, advantages and disadvantages of key technologies to help
practitioners determine if a certain implementation is feasible, and what performance level might be
expected. It features an informative discussion on how mobile network operators plan ongoing services and
manage resources, and also takes a look at future trends in this evolving area.
