Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics)

Eugene F. Krause

Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) Eugene F. Krause

This entertaining, stimulating textbook offers anyone familiar with Euclidean geometry — undergraduate math students, advanced high school students, and puzzle fans of any age — an opportunity to explore taxicab geometry, a simple, non-Euclidean system that helps put Euclidean geometry in sharper perspective. In taxicab geometry, the shortest distance between two points is not a straight line. Distance is not measured as the crow flies, but as a taxicab travels the "grid" of the city street, from block to block, vertically and horizontally, until the destination is reached. Because of this non-Euclidean method of measuring distance, some familiar geometric figures are transmuted: for example, circles become squares.

However, taxicab geometry has important practical applications. As Professor Krause points out, "While Euclidean geometry appears to be a good model of the 'natural' world, taxicab geometry is a better model of the artificial urban world that man has built."

As a result, the book is replete with practical applications of this non-Euclidean system to urban geometry and urban planning — from deciding the optimum location for a factory or a phone booth, to determining the most efficient routes for a mass transit system.

The underlying emphasis throughout this unique, challenging textbook is on how mathematicians think, and how they apply an apparently theoretical system to the solution of real-world problems.

From reader reviews:

Sylvia Johnson:

What do you in relation to book? It is not important along? Or just adding material when you require something to explain what the one you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? All people has many questions above. They should answer that question due to the fact just their can do this. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on guardería until university need this Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) to read.

Karen Johnson:

Do you certainly one of people who can't read enjoyable if the sentence chained inside straightway, hold on guys this aren't like that. This Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) book is readable by means of you who hate the perfect word style. You will find the information here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to offer to you. The writer regarding Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) content conveys objective easily to understand by most people. The printed and e-book are not different in the information but it just different such as it. So , do you still thinking Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) is not loveable to be your top collection reading book?

Jeffrey David:

Your reading 6th sense will not betray a person, why because this Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) guide written by well-known writer we are excited for well how to make book which might be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and creating skill only for eliminate your own personal hunger then you still doubt Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) as good book not merely by the cover but also from the content. This is one e-book that can break don't judge book by its protect, so do you still needing an additional sixth sense to pick this!?! Oh come on your reading sixth sense already said so why you have to listening to an additional sixth sense.

Mary Curtis:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's internal or real their pastime. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is to get complicated. Book is very important in your

case. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Taxicab Geometry: An Adventure in Non-Euclidean Geometry (Dover Books on Mathematics) can make you really feel more interested to read.
