## Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books)

Barrie D. Dunn

The objective of this book is to assist scientists and engineers select the ideal material or manufacturing process for particular applications; these could cover a wide range of fields, from light-weight structures to electronic hardware. The book will help in problem solving as it also presents more than 100 case studies and failure investigations from the space sector that can, by analogy, be applied to other industries. Difficult-to-find material data is included for reference. The sciences of metallic (primarily) and organic materials presented throughout the book demonstrate how they can be applied as an integral part of spacecraft product assurance schemes, which involve quality, material and processes evaluations, and the selection of mechanical and component parts.

In this successor edition, which has been revised and updated, engineering problems associated with critical spacecraft hardware and the space environment are highlighted by over 500 illustrations including micrographs and fractographs. Space hardware captured by astronauts and returned to Earth from long durations in space are examined. Information detailed in the Handbook is applicable to general terrestrial applications including consumer electronics as well as high reliability systems associated with aeronautics, medical equipment and ground transportation. This Handbook is also directed to those involved in maximizing the reliability of new materials and processes for space technology and space engineering. It will be invaluable to engineers concerned with the construction of advanced structures or mechanical and electronic sub-systems.

bility of new materials and processes for space technology and space engineering. It will be invaluable to engineers concerned with the construction of advanced structures or mechanical and electronic sub-systems.

### **From reader reviews:**

#### **Jack Lau:**

Book is definitely written, printed, or created for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important thing to bring us around the world. Alongside that you can your reading skill was fluently. A guide Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books) will make you to end up being smarter. You can feel much more confidence if you can know about anything. But some of you think that will open or reading some sort of book make you bored. It's not make you fun. Why they could be thought like that? Have you searching for best book or acceptable book with you?

#### **Donna Bradford:**

Playing with family within a park, coming to see the water world or hanging out with good friends is thing that usually you will have done when you have spare time, then why you don't try matter that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books), you are able to enjoy both. It is good combination right, you still want to miss it? What kind of hang type is it? Oh come on its mind hangout folks. What? Still don't have it, oh come on its referred to as reading friends.

#### **Latoya Brown:**

Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books) can be one of your starter books that are good idea. All of us recommend that straight away because this book has good vocabulary that could increase your knowledge in words, easy to understand, bit entertaining but still delivering the information. The author giving his/her effort to get every word into delight arrangement in writing Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books) yet doesn't forget the main level, giving the reader the hottest and also based confirm resource information that maybe you can be one among it. This great information can easily drawn you into brand new stage of crucial thinking.

#### **Elaine Moore:**

Don't be worry for anyone who is afraid that this book can filled the space in your house, you will get it in e-book way, more simple and reachable. This particular Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books) can give you a lot of friends because by you investigating this one book you have matter that they don't and make a person more like an interesting person. That book can be one of a step for you to get success. This book offer you information that might be your friend doesn't realize, by knowing more than other make you to be great folks. So , why hesitate? Let us have Materials and Processes: for Spacecraft and High Reliability Applications (Springer Praxis Books).
