Principles and Practice of Environmental Medicine

Principles and Practice of Environmental Medicine

Throughout the world, scientists and the general public are concerned about the adverse effects of environmental illness. Part II presents an overview of public health concerns about the adverse effects of chemical and physical agents commonly found in contaminated air, water, food, and soil. In the past, attention has focused on hazardous wastes also originating in the workplace. As a consequence, Part III characterizes the body's defense against occupational exposure. Defenses at the portals of entry are and established clinical discipline. Much less attention has been paid to nonoccupational hazards. There nutrition. Detoxication and immunologic defense is a growing awareness, however, of the dangers of mechanisms are described. Part IV indicates the exposure to toxic chemical and physical agents in importance of and provides instruction on the homes, community, and general environment, method of including occupational and environmental especially for the fetus, the infant, the very young, and the elderly, and the chronically ill, those most susceptible. Environmental medicine, focusing on the response to toxic exposure is discussed.
