Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series)

The Definitive Resource on Text Mining Theory and Applications from Foremost Researchers in the Field

Giving a broad perspective of the field from numerous vantage points, **Text Mining: Classification, Clustering, and Applications** focuses on statistical methods for text mining and analysis. It examines methods to automatically cluster and classify text documents and applies these methods in a variety of areas, including adaptive information filtering, information distillation, and text search.

The book begins with chapters on the classification of documents into predefined categories. It presents state-of-the-art algorithms and their use in practice. The next chapters describe novel methods for clustering documents into groups that are not predefined. These methods seek to automatically determine topical structures that may exist in a document corpus. The book concludes by discussing various text mining applications that have significant implications for future research and industrial use.

There is no doubt that text mining will continue to play a critical role in the development of future information systems and advances in research will be instrumental to their success. This book captures the technical depth and immense practical potential of text mining, guiding readers to a sound appreciation of this burgeoning field.

From reader reviews:

Glenna Monaghan:

Do you one among people who can't read pleasurable if the sentence chained from the straightway, hold on guys this kind of aren't like that. This Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) book is readable by means of you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving perhaps decrease the knowledge that want to provide to you. The writer of Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the articles but it just different available as it. So , do you even now thinking Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is not loveable to be your top list reading book?

Leon King:

Reading a guide can be one of a lot of exercise that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people enjoyed. First reading a guide will give you a lot of new data. When you read a e-book you will get new information since book is one of several ways to share the information or maybe their idea. When you reading through a book especially fictional works book the author will bring one to imagine the story how the figures do it anything. Third, you can share your knowledge to others. When you read this Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series), you could tells your family, friends and soon about yours publication. Your knowledge can inspire the mediocre, make them reading a publication.

Alexandra Robbins:

Precisely why? Because this Text Mining: Classification, Clustering, and Applications (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will surprise you with the secret it inside. Reading this book adjacent to it was fantastic author who all write the book in such wonderful way makes the content on the inside easier to understand, entertaining method but still convey the meaning entirely.
