"Madeline is a 15-year-old girl with abdominal pain and headaches that occur most days of the week. Because of her pain, she has missed 99 days of school this year and is no longer able to play volleyball. Her parents have taken her to see a number of specialists and she has tried many different medications but she has not experienced any improvement in her pain..."

Studies suggest that as many as four out of ten children and adolescents suffer from chronic pain. The causes of chronic pain in young people vary, from illness-related causes to pain following medical procedures. In fact, in some children the cause of chronic pain is never explained.
