Since 2006, when the “morning-after pill” Plan B was first sold over the counter, sales of emergency contraceptives have soared, becoming an \$80-million industry in the United States and throughout the Western world. But emergency contraception is nothing new. It has a long and often contentious history as the subject of clashes not only between medical researchers and religious groups, but also between different factions of feminist health advocates.

*The Morning After* tells the story of emergency contraception in America from the 1960s to the present day and, more importantly, it tells the story of the women who have used it. Side-stepping simplistic readings of these women as either radical feminist trailblazers or guinea pigs for the pharmaceutical industry, medical historian Heather Munro Prescott offers a portrait of how ordinary women participated in the development and popularization of emergency contraception, bringing a groundbreaking technology into the mainstream with the potential to alter radically reproductive health practices.
