Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications

Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications

Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications fills a gap in the existing literature by combining a plethora of WSN-based emerging technologies into a single source so that researchers can form opinions regarding these technologies. It presents different types of emerging communication technologies based on WSNs and describes how wireless sensor networks can be integrated with other communication technologies. It covers many of the new techniques and demonstrates the application of WSNs. The book's 14 chapters are divided into four parts.

The first part covers the basics of wireless sensor networks and their principal working methods. The authors then move on to discuss different types of WSNs, characteristics of different types of emerging technologies based on WSNs, renewable energy sources, battery replenishment strategies, and application-specific energy challenges of WSNs. The second part is dedicated to issues related to wireless body area networks (WBANs). It discusses wearable WSNs and their applications, standards, and research trends. The authors also discuss routing schemes devised for WBANs and thermal-aware routing protocols for WBANs.

The third part focuses on different emerging communication technologies based on WSNs, including electromagnetic wireless nanosensor networks, WSNs in the IoT, management of WSNs through satellite networks, WSNs in smart homes, and cognitive radio technology in conjunction with WSNs. The last part of the book covers topics generally related to typical WSNs, including energy-efficient data collection in WSNs, key distribution mechanisms in WSNs, distributed data gathering algorithms for mobile WSNs, and finally, a novel mobility scheme for WSNs that supports IPv6.

From reader reviews:

Beverly Harrison:

People live in this new morning of lifestyle always try to and must have the spare time or they will get large amount of stress from both daily life and work. So , once we ask do people have time, we will say absolutely indeed. People is human not only a robot. Then we consult again, what kind of activity are there when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative inside spending your spare time, often the book you have read will be Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications.

William Walker:

Your reading sixth sense will not betray you actually, why because this Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications publication written by well-known writer whose to say well how to make book that can be understand by anyone who have read the book. Written within good manner for you, leaking every ideas and publishing skill only for eliminate your own personal hunger then you still doubt Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications as good book not simply by the cover but also by the content. This is one reserve that can break don't ascertain book by its cover, so do you still needing an additional sixth sense to pick this particular!?! Oh come on your examining sixth sense already said so why you have to listening to one more sixth sense.

Bryan Donovan:

You can obtain this Emerging Communication Technologies Based on Wireless Sensor Networks: Current Research and Future Applications by go to the bookstore or Mall. Merely viewing or reviewing it could possibly to be your solve issue if you get difficulties for ones knowledge. Kinds of this book are various. Not only by written or printed but additionally can you enjoy this book by e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose correct ways for you.

Wanda Davis:

What is your hobby? Have you heard that question when you got pupils? We believe that that concern was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person similar to reading or as looking at become their hobby. You have to know that reading is very important as well as book as to be the point. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them is niagra Emerging
