## **Phagocytosis of Dying Cells** Dmitri V. Krysko, Peter Vandenabeele

This comprehensive volume integrates the most innovative and current findings from several related disciplines of scientific research, including pathology, immunology, genetics, and cellular and molecular biology. It is divided into two sections: “Molecular mechanisms of phagocytosis of dying cells” and “Impairment of phagocytosis of dying cells and its role in the development of diseases”. No other recent books devoted to this subject are available. All of the contributors are experts working at the forefront of scientific discovery, and the reviews they present systematically examine the most exciting and innovative aspects of their particular areas of expertise. Both researchers and physicians will find this volume of major benefit because it covers the immunological and molecular biological aspects of phagocytosis of dying cells as well as its clinical relevance.
