Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) Stefan Büttcher, Charles L. A. Clarke, Gordon V. Cormack

Information retrieval is the foundation for modern search engines. This textbook offers an introduction to the core topics underlying modern search technologies, including algorithms, data structures, indexing, retrieval, and evaluation. The emphasis is on implementation and experimentation; each chapter includes exercises and suggestions for student projects. Wumpus -- a multiuser open-source information retrieval system developed by one of the authors and available online -- provides model implementations and a basis for student work. The modular structure of the book allows instructors to use it in a variety of graduate-level courses, including courses taught from a database systems perspective, traditional information retrieval courses with a focus on IR theory, and courses covering the basics of Web retrieval. In addition to its classroom use, *Information Retrieval* will be a valuable reference for professionals in computer science, computer engineering, and software engineering.

From reader reviews:

Jillian Diaz:

The book Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) can give more knowledge and information about everything you want. Exactly why must we leave a good thing like a book Information Retrieval: Implementing and Evaluating Search Engines (MIT Press)? Some of you have a different opinion about publication. But one aim in which book can give many facts for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or data that you take for that, you could give for each other; you could share all of these. Book Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) has simple shape but the truth is know: it has great and massive function for you. You can appear the enormous world by wide open and read a book. So it is very wonderful.

Roger Thomas:

As people who live in the modest era should be update about what going on or details even knowledge to make all of them keep up with the era and that is always change and make progress. Some of you maybe will certainly update themselves by studying books. It is a good choice for yourself but the problems coming to you actually is you don't know what type you should start with. This Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) is our recommendation to help you keep up with the world. Why, because this book serves what you want and wish in this era.

Jill Weber:

Beside this Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) in your phone, it may give you a way to get more close to the new knowledge or information. The information and the knowledge you can got here is fresh from your oven so don't end up being worry if you feel like an previous people live in narrow commune. It is good thing to have Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) because this book offers for you readable information. Do you at times have book but you seldom get what it's about. Oh come on, that will not happen if you have this in the hand. The Enjoyable blend here cannot be questionable, just like treasuring beautiful island. Use you still want to miss the idea? Find this book as well as read it from at this point!

Larry Huff:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is created or printed or illustrated from each source which filled update of news. Within this modern era like now, many ways to get information are available for you. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just looking for the Information Retrieval: Implementing and Evaluating Search Engines (MIT Press) when you essential it?
